DEAN A. BEERS  
*American Patriot*

January 29, 2013  
Fort Collins, Colorado

On November 29, 2012, Mr. Beers began a project of passion and importance. An avid visitor of our history, the foundation for this book was laid many years ago with a passion for history, and peaked in witness of the decline of what was conceived by our Founding Fathers and all that fought, perished and even lost their personal fortunes to birth this greatest nation, freedoms and concept of government.

This 300+ page project of 40+ chapters has been one of the heart and mind. It is about the direction our Founding Fathers began for future generations, and the direction it has gradually taken since the early 20<sup>th</sup> century. It is about an emotional civil war of multiple class divisions. Seeing the history of our Constitution and Country ignored – which is to ignore and destroy the future of our Children and Grandchildren.

Our country was not founded in a day, week or year – it was decades in the formal sense, and a century and half historically. There was actually no desire to seek being an independent country, just the concept of freedoms, and respect from the crown. Sadly, our Country has devolved from the intents of our Founding Fathers. This book is a chapter-by-chapter of four sections looking into the founding documents, Founding Fathers, key events and the author's allocution and analysis of these sections looking at the issues they represent and solutions available from the efforts of our Founding Fathers.

The author will consider complimentary copies for credentialed media representatives. Please contact him directly for details and consideration.
